SUPREME DOOR SPRING CO.

E-Brochure

Supreme Door Spring Company specialises in supply and installation of door closures, door close operating equipment, floor springs, panic bolts, push bars, transom units and supply and maintenance of fire doors.

We are able to cover the greater London, Essex and M25 area. We provide free quotations and guarantee all labour and materials for 12 months.

Whether it is an emergency repair or planned maintenance contract, our aim is to provide you with the highest level of service in our industry.

We provide our expertise and experience to ensure that we use the correct solution for your spring door closure problem.

We can supply, fit and maintain all makes and models of door closer equipment and even repair or replace floor springs that are no longer manufactured.

High Quality Brands

At Supreme we only fit equipment of the highest quality from major manufacturers such as: Dorma, GEZE, Briton, Adams Rite, Peter Jackson, Axim, Gibbons, Newman Tonks, Jebron, Abloy, Viro, Chubb, Bramah, SC Speedy, Leggots, Union Yale.

All our vans are fully equipped with tools and materials to cover most aspects of the trade on initial site visit.

Health & Safety

All of our engineers have been fully briefed and tested on the latest Health & Safety legislations. All our engineers are security cleared for Government and Council contracts.

We also supply and fit timber and metal doors, all types of locks, door furniture and safety signage.

SUPREME DOOR SPRING CO.

Door Closers & Floor Springs

Door Closers & Floor Springs are used for a number of reasons:

- To Prevent smoke and/or fire spreading, maintaining the integrity of designated fire resisting doors and areas.
- To maintain security on external doors by ensuring they remain closed or locked after each use.
- To control the environment within buildings.
- To sustain a weather seal on external doors when closed.
- To retain privacy.

Both Door Closure types vary in size and strength depending upon door weight, dimensions and external conditions. We can supply and install all types of Door Closures.

SUPREME DOOR SPRING CO.

Panic Hardware

Panic Bolts and Push Bars are used on Fire Exits to allow fast and easy exit without the use of keys during an emergency, without sacrificing the security of the building. We also supply a full range of safety signage.

Briton

Planned Maintenance

Planned maintenance offers twice yearly inspections and reports. Overhead door closers and floor springs require maintenance due to variations of temperature and heavy usage. Doors can either slam shut or close too slowly, both of which can be dangerous.

Planned maintenance ensures that all door operating equipment is regularly inspected and adjusted. Any relevant recommendations are reported in order to help you comply with all Health and Safety regulations.

Further Information

For further information or to see our prices then please contact us where a member of staff will be more than happy to assist you.
